#### REDEVELOPMENT PROCESS

SITE SELECTION, DUE DILIGENCE, CLOSE

KELLY CLARKE AND RACHEL FOSTER TRAINING
KALAMAZOO COUNTY LAND BANK, WARNER, NORCROSS & JUDD
JUNE 15, 2021

#### **BUILD YOUR TEAM**

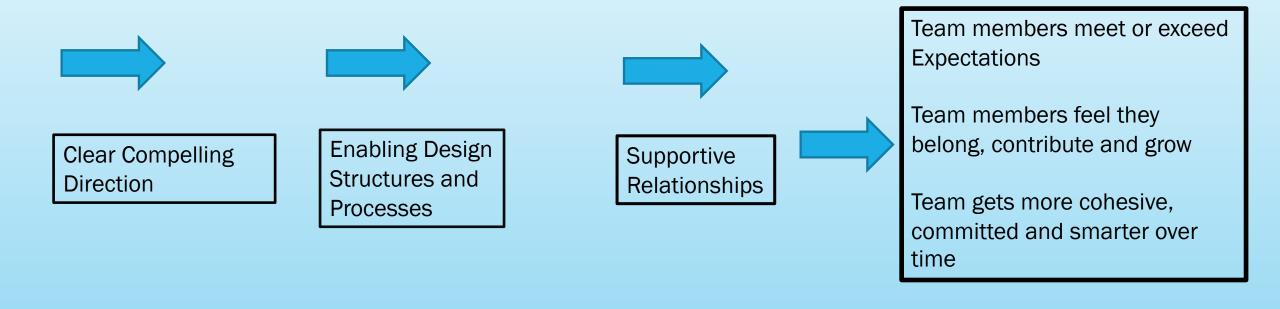

- REAL ESTATE ATTORNEY
- TITLE COMPANY
- SURVEYOR
- ENVIRONMENTAL CONSULTANT
- ARCHITECT
- CONSTRUCTION MANAGER secure now or you can secure later depending on your process and procurement
- Your point person (s) Lead (s)

#### What Great Teams Have in Common

### SITE SELECTION FIRST STEPS

Select

Select Site

**Apply** 

Apply for property via Land Bank application process

If you are considering other parcels you might consider working with a realtor

Work

Work with
Environmental Firm and
Complete
Environmental Review

Investigate

Confirm zoning, site plan review requirements, and investigate title commitments and survey

**Prep for Closing** 

Work with your attorney and title company to prepare closing docs and coordinate with land bank

#### SITE SELECTION QUESTIONS TO ASK YOURSELF

Will this site allow me to meet my goals and achieve impact?

What are the potential pros and cons of this site?

What is the zoning and how does that impact what I want to accomplish with the site?

What funding do I have committed or in process?

Will I need to raise more funds for this site? What is my ballpark number?

#### **ENVIRONMENTAL DUE DILIGENCE**

Records Review, Historical Use of Get a Phase I Property, Location, surrounding property report analysis of issues Does Phase I Report show RECs? If Yes, get a Phase If no, you are II Proposal and have Phase II done done

Examples: exploration for underground fuel tank, soil testing, water sampling, vapor intrusion, etc...

# PHASE TWO REQUIRED - NOW WHAT: STAY CALM

- Some items may prove to be non-problematic based on the phase two further study
- Some issues can be mitigated or managed for your use
- ■The results can help you make an informed decision – some issues may be problematic for your project and cause you to decide not to close and to research other sites.

#### **ENVIRONMENTAL DUE DILIGENCE CONTINUED**

If Phase II Is Needed

If no - discuss implications for your project with your EC and your Legal - Decide if you still plan to proceed to close and if yes what mitigation if any is necessary

Are
Phase II
Results
Clean?

If proceeding to close, complete BEA and Due Care Plan

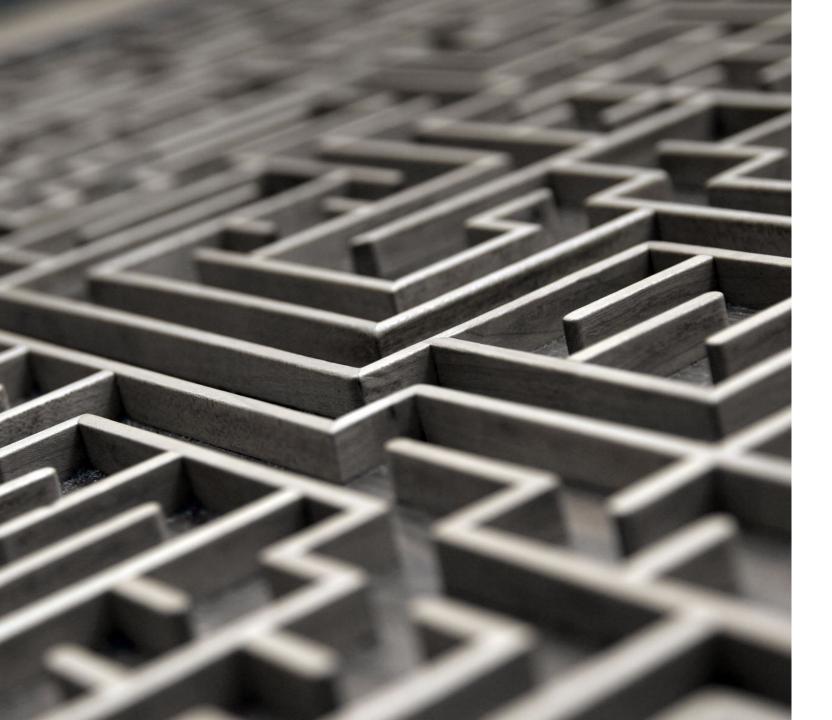

If yes, you are done

#### **INVESTIGATE**

- Zoning Understand the uses permitted in the zoning district by right; understand the uses permitted with a special use permit. Where does your use fall? Are there any other special zoning considerations?
- Meet with the zoning administrator for the municipality
- Site Plan Review Requirements Understand the requirements and the timing to obtain necessary approvals. Also understand the length of time that approvals remain valid.
- Review of Title Commitment Review the title commitment and also the exception documents referenced in the title commitment.
- Schedule B I includes any requirements. These are the items you need to satisfy to get to a closing.
- Schedule B II lists the "exceptions" that impact the property. Know the difference between "standard" exceptions that are included in every title commitment and specific exceptions that that impact your property. Read the documents.

#### **INVESTIGATE**

- Obtain and review a Survey Share the title commitment and documents with your surveyor.
- •Understand the different types of surveys ALTA, Boundary, Mortgage Report
- If you decide to obtain an ALTA survey complete the Table A requirements. Decide what you need to have shown on the survey.
- Utilize your Real Estate Attorney This is where the attorney can bring real value to the deal.
- Have the attorney review the title commitment and survey together. This will help you understand what is an impediment to your project and what is not a deal killer.
- Recognize that the Land Bank may be a partner in this process; however, it is up to you to conduct due diligence and determine if you want to purchase the property.
- Land Bank has authority to conduct a quiet title and may have already done so with some properties. This does not include all properties. There are also limits. Interests extinguished are "stray" interests left over after a tax sale. Certain interests cannot be extinguished i.e., easements.

#### Decision Time.....

make a decision about proceeding with purchase after investigations and environmental reviews are complete

- If No explore other site options
- If Yes prep for closing

#### PREP FOR CLOSING

- 1. Ask your Attorney to Request closing documents in Advance from the title company
- 2. Have your attorney review
- 3. Consider whether your board needs to meet and formally approve the transaction and designate someone with signing authority for the transaction
- 4. Understand property tax consequences
- 5. Have property insured speak with your insurance agent
- 6. Identify a plan for if the building becomes subject to casual entry prior to renovation

#### You have Closed - Now What?

#### Other Steps to consider

Design Workshop(s) to build a vision for the site

- 1. Identify stakeholders
- 2. Secure architect
- 3. Hold design sessions with architects and stakeholders
- Have architects consult with construction expertise and build out cost estimates
- 5. Bring on board your Construction Manager if you have not already
- 6. Create funding plan
- Create tentative plan and calendar for execution

### Set your Team up for Success! Effective Teams Need......

#### Resources

- Specialized skills/ capacities
- Funding
- Time
- Site where conditions are aligned with project goals and constraints

#### **Effective Team Processes**

- Clear roles and accountabilities
- Regularly structured meetings and progress tracking
- Structure for documented tracking and changes (budget, project and team details)
- Clear communication within team and to external partners

## Intentional and deliberate mutual support within Team and with partners

- Respectful but direct communication about needs and challenges
- Solutions oriented mindsets (avoid the blame game when things go wrong)
- Team members take individual accountability for their deliverables and their behaviors, bring your best self
